

Playseat challenge manual

Continue

column being between my legs, but can say it causes no issues or discomfort and now I don't even realize its there. I also purchased the seat holder and the gear shift holder. Gearshift holder was very easy to install with these units. The price was very complicated to install and almost felt over-engineered BUT once installed it is a wonder and feels so solid. I would say don't follow the instructions on the seat slider as they are not very good. All in all I am very happy with the seat. Its not a cheap seat but I would definitely recommend this to anyone. I am enjoying my seat with not only diving simulators but with all of my games. zielony - Poland Overall Price / Quality Comfort Design Fun Fajny fotel idealny do grania w symulatory wyścigów. Brakuje mi tylko podłokietnika, szkoda że nie ma go w ofercie. evdeb - Netherlands Overall Price / Quality Comfort Design Fun stoel + racestuur geth - Canada Overall Price / Quality Comfort Design Fun I recently bought this seat. Along with the gear shifter pro. The seat is very comfortable easy to install and set up. Has a very user friendly fully adjustable set up designed to fit your comfort. This unit also folds down to accommodate small spaces. The gear shift pro was very easy to install with these units. It's such good quality for the price. And the price is not bad at all. Only 1 flaw I found with this chair. If your a little shorter your brake pedal might be blocked by the bar that holds your steering wheel. 10/10 would recommend to anyone who wants to get into the hobby. WhiteKnucklz - United States Overall Price / Quality Comfort Design Fun The 'Playseat Evolution' is a very well made and durable product at it's given price point. Aesthetically speaking this is a great way to get the look and feel of getting behind the wheel without breaking the bank. My only criticism of this particular model would be Logitech G27 compatibility. Per other reviews the pedal assembly does not offer enough connection points without additional drilling. In addition, the steering wheel assembly can only be adjusted up/down, not allowing for a 'tilt' adjustment to the G27 wheel. Bob - Canada Overall Price / Quality Comfort Design Fun Great Chair for the price very solid easy to build about 30 minutes. Im very satisfied. HappyCustomer - United Kingdom Overall Price / Quality Comfort Design Fun The Playseat evolution is a brilliant piece of kit for any driving enthusiast gamer. The Thrustmaster 458 Italia wheel and pedals fit easily to the platforms and can be angled to suit the driver. The seat slider is a great addition to the realistic feel of the driving experience and makes getting into the seat and adjustments quick when you have to switch drivers. Highly recommended. X-eia422 - Canada Overall Price / Quality Comfort Design Fun The "Playseat Evolution" is well built, solid and stable. These are pieces of good qualities and it is simple to mount. The only negative to mention: the pedal support is not compatible with the pedal system of the Logitech G27. I had to drill an additional hole to install the pedals properly and securely. It keeps up with only two (2) screws. Other than that, just fun!! ***Design: Only 3 stars because the pedal bracket is not compatible with ALL types of pedals as mentioned on the site.*** Ron Levi - Israel Overall Price / Quality Comfort Design Fun The product arrived only a week after order. The product was easily built. You can see that the product is steady and can be easily take apart for storage. Thank you xxDUNGERxx - United States Overall Price / Quality Comfort Design Fun I have now had the Playseat Challenge, and upgraded to this one. This chair is great, it is heavy so portability isn't quite as good, but if you want a great comfortable experience when playing your games this is the seat for you. I have nothing negative to say, the quality is great, the instructions were easy and I plan on enjoying this chair for a long time. morgan - China Overall Price / Quality Comfort Design Fun 做工及材质都不错, 安装也很方便, 但是踏板的调整有点费劲, 比如油门和刹车的问题, 如果能够使踏板可以左右方向有较大幅度的调整可能更好了。 Nigel - Canada Overall Price / Quality Comfort Design Fun This seat is ideal for ultimate racing fans! Perfect simulation to being in a real race, absolutely awesome! Good price, fast shipping, and overall great quality!! Highly recommended. Rosh2097 - United Kingdom Overall Price / Quality Comfort Design Fun What a great piece of kit, I am the envy of my friends now and it even is easy to store in the side of my smallish lounge as well. One of my best purchases of the year. I did have issues trying to assemble the optional slider though, apart from that is is easy and straight forward and very sturdy. JeffGMJ - South Africa Overall Price / Quality Comfort Design Fun Love it, wish it was a little more comfortable for those longer endurance races. Bones - United States Overall Price / Quality Comfort Design Fun It's a real driving experience. best feel. fred - United Kingdom Overall Price / Quality Comfort Design Fun Always loved racing games but never had anywhere to secure the steering wheel and pedals properly. I decided to get a playseat and its awesome, does not take up that much space and is really comfortable. I bought this specifically to play project cars and have clocked up over 40 hours in the seat so far in the first four weeks! The seat provides the perfect solution to get those lap times down and provides total emersion. Thanks playseat for a totally awesome product and super fast delivery. TonyBear - Canada Overall Price / Quality Comfort Design Fun Playseat Evolution is a great seat! It feels like your sitting on a real car. This seat along with the Logitech G27 racing wheel go well together. This seat actually gives a great atmosphere to my home basement which makes it more exciting. I recommend this seat to anybody looking for a great racing seat at a great price. Joe - Colombia Overall Price / Quality Comfort Design Fun To many cables thah can't be attached to the wheel pole, so this interfered with the movement of the legs, it's may be wrong installed but it will be better if they come on the inside of the pole, some how. Great fun and we need another to compete one against the other with my son. Alex - Canada Overall Price / Quality Comfort Design Fun I've been having an awesome time with my Playseat Evolution and G27 racing wheel since i've had them. I'm a Gran Turismo player and being able to play the game in an actual driving position makes the experience so much more immersive and engaging. One thing I was worried about before getting the seat was the stability of it. I'd read reviews of other seats where people were complaining about their seat's wheel holder wobbling when they did sudden steering movement; with this seat that's definitely not an issue. It's very stable and comfortable, I can race for hours without any problem. The ONE thing that I'm disappointed about is the design of the pedals section. If you have a 3 pedal set like the one that comes with the G27, you'll find that you have to reach behind the bottom part of the wheel holder with your right foot when you want to brake. It just gets in the way and that can be annoying at times. Other than that i'm happy with my purchase and would recommend this seat to fellow sim racers. txshutterbug - United States Overall Price / Quality Comfort Design Fun I always wanted a racing chair that could accommodate a racing wheel, and this chair doesn't disappoint. I've had a much more enjoyable experience with my racing games since I purchased it. The chair was very easy to put together and the construction is sturdy. I think anyone wanting a quality gaming chair should seriously consider purchasing the Playseat Evolution, or any of the other chairs manufactured by the company. Maurice - Netherlands Overall Price / Quality Comfort Design Fun This is the best gaming seat, the leather is really good quality, easy to install with the manual and the steering wheel fits perfect! It is a really good design, you can set the seat perfectly to your body for the best gaming and race performance. It is really worth the money! Also if you race intense the seat stay stable! Perfect! 3 points to say Good comfort seat Perfect installation Good design and very stable seat! Michael L. - United Kingdom Overall Price / Quality Comfort Design Fun The seat is very comfortable and tucks you in like a real race seat. It is very easy to setup as all instructions are straight forward and they supply you with all the tools so you don't have to worry. Will Price / Quality Overall Comfort Design Fun The details on this thing are the best. You can tell it's high quality craftsmanship. I love how stable it is, even during super fast racing action. The Evolution is not the cheapest racing chair but I think it's definitely worth the money. Aaron Price / Quality Overall Comfort Design Fun This sim seat is amazing. It looks fantastic, is extremely stable, very adjustable and the design is neat and looks professional. The experience you get here is unbeatable. Tom Price / Quality Overall Comfort Design Fun I'm using the Playseat Evolution a few weeks now and it's really awesome! Putting the chair together was quite easy (with the instruction manual). It took me less than half an hour. After installing my Logitech G27 wheel I used the zip ties that come with the package to keep the wiring out of the way. It's amazing how comfortable and adjustable this chair is. It took me a while to get everything in the right position, but that was mostly because I couldn't wait to play, so I adjusted everything in between games. You have to be a bit flexible to reach the brakes, because of the steering wheel bar that stands between your legs, but that doesn't really bother me, since the racing experience is awesome! 184 user reviews | Back to top
